ADDITIONAL CLAIMS 10/081,036

6. The Cardone System links all checkpoints to one Federal Identification Card.
7. The Card One System must clear each checkpoint, be updated and validated before another check point may be transversed.
8. The Cardone system and process links the cardholder, the Federal Government, the checkpoints and the Airline to one Identification which must be verified and updated at each checkpoint before proceeding
9. One checkpoint may not be passed without the proper order and path; the Government database and each checkpoint must be cleared.
10. The Cardone System creates a path that controls the cardholders movements through sterile and non-sterile areas via a permanent Identification.
